

# The World's Finest Plasters

Dimensions offers a collection of the finest pure slaked lime plasters and natural earth pigments which are UV resistant, VOC free, and inhibit mold and mildew.

Dimensions lime plasters are from the highest quality limestone, fired at high temperatures to remove clay and other impurities – this is the very same technique perfected by the Romans to obtain the lime that was the base for Pompeii's frescoes.

Our plasters, once fully cured, revert to limestone, thus providing a durable surface and high-end aesthetic. UNESCO obtains plasters used in the restoration of Europe's historical buildings from the same Italian quarries. Dimensions sources for our line of fine plasters.

These products are now available exclusively through Dimensions.
